The Company

Our company gained a long productive experience, for almost 50 years working in this food sector choosing high quality raw materials to guarantee a fantastic taste of our in oil and in vinegar canned vegetables. We personally follow all the working stages: cleaning the raw materials, cooking, aromatic baths, drying jarring, mechanical lid closure, pasteurization, in the end labelling and stocking. We are specialized in the production, conserving and packing vegetables in oil. The productive sector is complete with our creams and fish products.
